Required Skills:

- 3 years' experience in manual QA testing.
- 2 years' experience writing test documentation such as STD, STR.
- Fluent in verbal and writing English.
- Familiarity with networking

Desired Skills:

- Experience testing embedded systems.
- Graduate SQA Course with ISTQB Certification.
- Automatic QA experience. (Selenium preferred)

About the Company

ContinUse develops remote and unified biometric sensor/platform for eHealth, Internet of Things, mobile & consumer devices. It is based on remote, contactless, active and continuous biometrics scanning. The system actively and continuously measures biomedical parameters, providing authentication and bio-competence information of individuals. The sensor/platform is capable of measuring various bio parameters simultaneously for authentication, health and wellness monitoring.
