- Experience with Database: SQL Server, Oracle.
- Experience with Internationalization and Localization.
- Experience with HTML5, jQuery and JSF JavaScript, web interfaces.
- Experience with Apache & Tomcat.
- Experience with C/C++.
- Experience with OS X / IOS.

About the Company

ContinUse develops remote and unified biometric sensor/platform for eHealth, Internet of Things, mobile & consumer devices. It is based on remote, contactless, active and continuous biometrics scanning. The system actively and continuously measures biomedical parameters, providing authentication and bio-competence information of individuals. The sensor/platform is capable of measuring various bio parameters simultaneously for authentication, health and wellness monitoring.
