Java Software Engineer
Petach Tikva

At Cadence, we hire and develop leaders and innovators who want to make an impact on the world of technology.

We're looking for a Java developer with good engineering skills to join our development team and develop server-side components and interfaces for vManager distributed server and applications.

You will work on new and emerging solutions with an experienced and diverse team in an Agile, fast pace environment while maintaining a work/home balance.

Requirements:
- B.Sc. in Software/Computer engineering from a leading University with grades average of 90+. Please attach an updated grades sheet.
- 1-2 years of development experience in Java or other JVM based language.
- Preferably have knowledge in working with DB’s (PG).
- Preferably have experience with Spring platform.
- Familiar with other programming languages (Python/Groovy/C++).
- Ability to learn and solve interesting challenges.
- Can articulate well in English.
- Good communication skills and collaboration capabilities.
- Independent, with internal drive and self-motivated.
- Detailed oriented that can see the big picture.

We’re doing work that matters. Help us solve what others can’t.
